

Hello Challenger!

Welcome to break the query! To surpass this challenge, you must write queries to satisfy the given questions. The queries will be based on a **Bank** RDBMS schema.

A diagram depicting this schema is given below.

1. Account

- **Columns:**

- **ID:** Unique account ID.
- **AccountNumber:** Unique account number.
- **AccountType:** (Savings, Current, Fixed Deposit).
- **Balance:** Account balance.
- **CustomerID:** Links to the customer who owns the account.
- **BranchID:** Links to the branch managing the account.

- **Relationships:**

- **Customer ↔ Account:** A customer can have multiple accounts.
- **Branch ↔ Account:** A branch manages multiple accounts.

2. Branch

- **Columns:**

- **ID:** Unique branch ID.
- **Name:** Branch name.
- **Address:** Branch address.
- **IFSC_Code:** Branch IFSC code.

- **Relationships:**

- **Branch ↔ Account:** Each branch manages accounts.
- **Branch ↔ Employee:** Each branch has multiple employees.

3. Customer

- **Columns:**

- **ID:** Unique customer ID.
- **Name:** Customer's name.
- **Email:** Unique email address.
- **Phone:** Contact number.
- **Address:** Customer address.
- **DateOfBirth:** Customer's date of birth.

- **Relationships:**

- **Customer ↔ Account:** A customer can have multiple accounts.
- **Customer ↔ Loan:** A customer can take out multiple loans.

4. Employee

- **Columns:**

- **ID:** Unique employee ID.
- **Name:** Employee's name.
- **Position:** Job role of the employee.
- **Salary:** Employee salary.
- **BranchID:** Links to the branch the employee works in.

- **Relationships:**

Branch ↔ Employee: Each branch has multiple employees.

5. Loan

- **Columns:**

- **ID:** Unique loan ID.
- **LoanType:** Type of loan (Home Loan, Car Loan, etc.).
- **Amount:** Loan amount.
- **InterestRate:** Loan interest rate.
- **LoanDate:** Date loan was issued.
- **CustomerID:** Links to the customer who took the loan.

- **Relationships:**

- **Customer ↔ Loan:** A customer can take out multiple loans.
- **Loan ↔ LoanPayment:** A loan can have multiple payments.

6. LoanPayment

- **Columns:**

- **ID:** Unique payment ID.
- **PaymentAmount:** Amount paid for the loan.
- **PaymentDate:** Payment date and time.
- **LoanID:** Links to the loan being paid.

- **Relationships:**

- **Loan ↔ LoanPayment:** A loan can have multiple payments.

7. Transaction

- **Columns:**

- **ID:** Unique transaction ID.
- **TransactionType:** (Deposit, Withdrawal, Transfer).
- **Amount:** Transaction amount.
- **TransactionDate:** Date and time of the transaction.
- **AccountID:** Links to the account involved in the transaction.

- **Relationships:**

- **Account ↔ Transaction:** An account can have multiple transactions.
